GENERAL SUMMARY QUARTERLY REVIEW

NOVEMBER 2015

HIGHLIGHTS

GENERAL DATA

- There are currently 1.2 million F & M students studying in the United States.
- There are currently 201,800 J-1 exchange visitors in the United States.
- There are 8,803 U.S. schools certified by SEVP to enroll international students.
- Seventy-five percent of SEVP-certified schools have 50 or less enrolled F & M students.
- Seventy-four percent of all F & M students are enrolled in bachelor's, master's or doctoral programs.
- There are 466,900 F & M students studying science, technology, engineering and mathematics (STEM) fields in the United States.
- Thirty-nine percent of all F & M students in the United States are studying in STEM fields.
- Fifty-two percent of all F & M students enrolled in K-12 programs of study are from China; 11 percent are from South Korea.
- Seventy-six percent of all F & M STEM students are enrolled in engineering, computer and information sciences, and support services, or biological and biomedical sciences degree programs.

TRENDS

- Compared to July 2015, the total number of active J-1 exchange visitors in the United States decreased 17.5 percent, from 244,766 exchange visitors in July 2015 to 201,800 exchange visitors in November 2015.
- Compared to July 2015, the total number of active F & M students studying in the United States increased 13.3 percent, from 1,054,505 students in July 2015 to 1,194,780 in November 2015.
- Compared to July 2015, the total number of active F & M students enrolled in primary and secondary school programs increased 35 percent, from 49,377 students in July 2015 to 66,889 in November 2015.

INTRODUCTION

WHAT IS THE STUDENT AND EXCHANGE VISITOR PROGRAM (SEVP)?

The Student and Exchange Visitor Program (SEVP), a program within the U.S. Immigration and Customs Enforcement (ICE), acts as a bridge for government organizations that have an interest in information on nonimmigrants whose primary reason for coming to the United States is to be students.

On behalf of the U.S. Department of Homeland Security (DHS), SEVP manages schools, nonimmigrant students in the F & M visa classifications and their dependents.

The U.S. Department of State manages Exchange Visitor Programs, nonimmigrant exchange visitors in the J visa classification and their dependents. Both SEVP and the Department of State use the Student and Exchange Visitor Information System (SEVIS) to track and monitor schools; exchange visitor programs; and F, M and J nonimmigrants while they visit the United States and participate in the U.S. education system.

INTRODUCTION

WHAT IS THE STUDENT AND EXCHANGE VISITOR INFORMATION SYSTEM (SEVIS)?

SEVIS is the Web-based system that DHS uses to maintain information on SEVP-certified schools and the F & M students who come to the United States to attend those schools. SEVIS also maintains information on Department of State-designated exchange visitor program sponsors and J-1 visa exchange visitor program participants. It is a critical tool in SEVP's mission to protect national security while supporting the legal entry of the more than one million F, M and J nonimmigrants to the United States for education and cultural exchange.

INTRODUCTION

WHAT IS SEVIS BY THE NUMBERS?

SEVIS by the Numbers is a quarterly report that highlights nonimmigrant student and exchange visitor trends and information using data from SEVIS, which SEVP uses to track and monitor the status and activities of nonimmigrant students and exchange visitors who enter the United States.

The report highlights key SEVIS data in an engaging way to illustrate trends, values and information on nonimmigrant students studying in the United States.

DEFINITIONS

- **Nonimmigrant** – Person entering the United States to visit, study or work (depending on the type of visa) temporarily, but not to stay permanently in the United States.
- **F-1 nonimmigrant student** – Nonimmigrant status conferred on a student pursuing a full program of study in a college, university, seminary, conservatory, academic high school, private elementary school, other academic school or language training program in the United States that is SEVP-certified to enroll F and/or M students.
- **M-1 nonimmigrant student** – Nonimmigrant status conferred on a foreign national pursuing a full program of study at an SEVP-certified vocational school or other recognized non-academic school (other than in language training programs).
- **J-1 exchange visitor** – Foreign national selected by a Department of State-designated program to participate in an exchange visitor program.
- **STEM** – Science, technology, engineering and mathematics programs of study.

GENERAL OVERVIEW

Since July 2015, the total number of SEVIS records for active F & M students, exchange visitors and their dependents increased by 7.03 percent, from 1,451,824 to 1,533,845. When compared to November 2014, the number of active F & M students, exchange visitors and their dependents increased 10.77 percent, from 1,402,795 to 1,533,845.

STEM DATA

STEM FIELDS OF STUDY

Science, technology, engineering and mathematics (STEM) are popular programs at American colleges and universities. Graduates from these programs are important to innovation and job creation in the United States.

An F-1 and/or M-1 student can find STEM programs at all educational levels. Many colleges and universities offer programs in these fields at both the undergraduate and graduate levels. Community colleges also have a variety of STEM programs in which a student may enroll.

STEM programs are classified according to the Classification of Instructional Programs codes developed by the U.S. Department of Education's National Center for Education Statistics.

FOCUS ON SOUTH KOREA

GENERAL OVERVIEW

South Korea ranks third overall for number of F & M students that come to study in the United States. Only China and India have more. F & M students from South Korea comprise 7 percent of the entire F & M student population and 4 percent of the STEM student population in the United States.

Since November 2014, the number of students studying in the United States from South Korea decreased 7 percent, and the number of South Korean students enrolled in secondary school degree programs decreased 14 percent. Forty percent of F & M students from South Korea are enrolled in bachelor's degree programs. Only 20 percent of F & M students from South Korea study in STEM fields.
